Guide:

1. Make sure you're in the main branch locally and `git pull origin main` any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet

5. Add the output file to any location of your choice in your repository folder
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
8. Track the file(s) via `git add`
9. Commit the changes via `git commit` (don't forget the commit message)
10. Push the changes to GitHub via `git push` (don't forget to refer to the proper branch)
11. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
12. Open and complete the merge of the pull request (it should turn purple)
13. Locally checkout main and pull the latest changes (to prepare for future work)
14. Take the same output file and upload it to Canvas

Task #1 - Points: 1

Text: Fill in the below prompts

#1) What concepts/topics were totally new to you?

Explanation (required) ✓

Mention specific concepts/topics

PREVIEW RESPONSE

Some of the concepts that were totally new to me came from Javascript and HTML. I was already familiar with everything from css. The thing that was a bit new to me, was HTML forms, since I didn't really work with them as much in HTML in my past projects. And for JS, a concept that was also a bit new to me, was Asynchronous in JavaScript. I was familiar with this concept in other languages, but the syntax and concept in JS was new to me.

#2) What concepts/topics were you already familiar with?

Explanation (required) ✓

Mention specific concepts/topics

PREVIEW RESPONSE

Since I took CS490 last semester, I was very familiar with all the basics of the 3 languages we were reading today. I was familiar with all the introduction readings for HTML, JS, and CSS. And since I was tasked with a lot of styling on last semester CS490 project, I was very familiar with all the readings in CSS, including topics like Links and Lists.

#3) What topics do you still not feel confident about? If confident

Explanation (required) ✓

At least a few reasonable sentences.

PREVIEW RESPONSE

The two languages I still don't feel confident about, are HTML and JS. Specifically, concepts like HTML forms and JS Promises are still a bit confusing to me because of my lack of experience of using it in projects. I think I will need to refer to documentation on how it works, in order to actually use it.
