Instructions

^ COLLAPSE ^

1. Visit w3schools and go to the PHP Tutorial: https://my-learning.w3schools.com/tutorial/php
2. Complete the following readings
   1. Introductions Lessons 1.1 - 1.6
   2. Variables 2.1 - 2.2
   3. Echo/Print 3.1
   4. Data Types Lessons 4.1 - 4.5
   5. String Lessons 5.1 - 5.5
   6. Operators and Math Lessons 6.1 - 6.2
   7. Conditionals Lessons 7.1 - 7.6
   8. Loops Lessons 8.1 - 8.7
   9. Functions Lessons 9.1
   10. Arrays Lessons 10.1 - 10.10

Guide:

1. Make sure you're in the main branch locally (`git checkout main`) and `git pull origin main` any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
   1. Track the file(s) via `git add (name_of_file)`
   2. Commit the changes via `git commit -m "some summary of the work"` (don't

forget the commit message)

3. Push the changes to GitHub via `git push origin (the_branch_name)` (don't forget to refer to the proper branch)
4. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
5. Open and complete the merge of the pull request (it should turn purple)
6. Locally checkout main and pull the latest changes (to prepare for future work)

8. Take the same output file and upload it to Canvas

Branch name: M2-PHP-Readings

Tasks: 2 Points: 10.00

● **Readings (8 pts.)**

Task #1 - Points: 1

Text: Readings

#1) Introductions Lessons 1.1 - 👁

Caption (required) ✓
Describe/highlight what's being shown
The screenshot I provided shows that I have successfully completed all the readings for "Introductions Lessons 1.1 - 1.6"

#2) Variables 2.1 - 2.2 👁

Caption (required) ✓
Describe/highlight what's being shown
The screenshot I provided shows that I have successfully completed all the readings for "Variables 2.1 - 2.2"

#3) Echo/Print 3.1 👁

Caption (required) ✓
Describe/highlight what's being shown
The screenshot I provided shows that I have successfully completed all the readings for "Echo/Print 3.1"

#4) Data Types Lessons 4.1 - 4.5 👁

Caption (required) ✓
Describe/highlight what's being shown
The screenshot I provided shows that I have successfully completed all the readings for "Data Types Lessons 4.1 - 4.5"

#5) String Lessons 5.1 - 5.5 👁

#6) Operators and Math Lessons 6.1 - 👁

#7) Conditionals Lessons 7.1 - 👁

#8) Loops Lessons 8.1 - 8.7 👁

∧COLLAPSE ∧

Text: Reflect on the following topics

#1) What concepts/topics were totally new to you? 👁

#2) What concepts/topics were you already familiar with? 👁

#3) What topics do you still not feel confident about? If confident 👁

Explanation (required)
Explanation (required)
Explanation (required)

Explanation (required) ✓

Mention specific concepts/topics

📄 PREVIEW RESPONSE

I thought I had past experience with working with PHP, but things like creating all the types of "loops" felt completely new to me. It looked very similar to Bash or Perl, which I was familiar with so I quickly learned. I also had to completely learn things like all the array types and how to declare them in PHP.

Explanation (required) ✓

Mention specific concepts/topics

📄 PREVIEW RESPONSE

I've taken CS288 before, and we went over PHP in that class as well, so I was familiar with this language. However, it was very brief and I forgot some of it. I still remembered basic things like some of the syntax of PHP and things such as how to echo/print statements. I also was still comfortable creating basic if/else-if statements. Even things like how you create variables in PHP seemed very familiar to other languages I worked with such as Perl or Bash, which made the process of learning it easier and I felt like I already have been familiar with it.

Explanation (required) ✓

At least a few reasonable sentences.

📄 PREVIEW RESPONSE

Even though I have some past experience with it, I am still not comfortable or confident in my ability to create and remember the syntax of PHP, especially when it comes to creating all the array types in PHP. I often forgot that I needed to add a "$" or misplace a ";" somewhere. And things like Multidimensional Arrays are still very confusing to me. Overall, it is going to take some practice before I feel confident in my ability to understand the PHP syntax again.
